

# Gas Detector

## Wireless

### MD-2006RF

- New Nanotechnology sensor.
- Automatic reset, it will disconnect automatically, when obviate alarm.
- Gas detected: coal gas, natural gas, LPG(liquefied petroleum gas).
- Automatic fault detection.
- With solenoid valve drive functions, automatic or manual on / off solenoid valve

The MD-2006R gas detector features:high sensitivity and stable reliability,compact size, It has a built-in transmitter to send an alarm signal, and has a buit in back up battery.

## Specification

### Overview

Display	Blue backlit LCD display
---------	--------------------------

Power	220V
-------	------

Transmission frequency	2.4GHz (Zigbee HA1.2)
------------------------	-----------------------

Wireless communication distance	≤50m (visible distance)
---------------------------------	-------------------------

Buzzer Volume	85db
---------------	------

Sensor operating temperature range	-20°C-50°C
------------------------------------	------------
