Biometric
Card Reader Door

CXC-32B

Access control terminal with advanced BioID Technology, it Posesses outstandingly high identification and side-beams minimise the interference occured during fingerprint verification and ifrared technology enables the device to function automaticaly when fingerprints are detected, reducing unnecessary electrical usage thus saving energy

Specification

Product Specifications	
Display	2.4 Inch TFT LCD Color Screen With TP
Fingerprint Capacity	2000
Password Capacity	2000
Card Capacity	2000
Fingerprint Sensor	Semiconductor
Capacitance	192*192
Communication	RS48S
Access Control Interface	3rd Party Electric Lock
Power Supply	5V DC, 1A
Operating Temperature	0 -45
Operating Humidity	20% - 80%
