PoE Switch

PoE Switch can provide both 10/100/1000 m Ethernet data and Power over network cable, it can be used as Ethernal Power Sourcing Equipment. it can automaticaly detect and identify whether connected devices such as IP camera comply with standard IEEE PoE 802,3af, 802,3at and supply power for them. PoE switch easier the deployment of wireless AP. IP camera and IP-based network equipment

Features

- Power over Ethernet (PoE) for IP cameras & network devices
- 10/100/1000 Mbps Ethernet support
- Complies with IEEE 802.3af/ 802.3at PoE standards
- Automatic device detection & power supply
- Auto MDI/MDIX for easy connection
- LED indicators for status monitoring
